

The applicant asserts that the claims 14- 35, now amended, are patentably distinguishable over the prior art and in condition for allowance.

### **Oath/Declaration**

A new oath in compliance with 37 CFR 1.125(b) is submitted herewith. Please correct the record to show the applicant's name to be: Lisa White-Burnett

### **Drawings**

The substitute drawings provided in the after-Final Office Action response are resubmitted herewith. The drawings were amended to address the examiner's objections and to show all the elements positively claimed in the newly amended claims. The amendments are as follows:

The description of the invention was corrected in the substitute specification to more clearly set forth the invention. Therefore, the ceiling fan paddle/blade, the decorative arm, the screws, the turning mechanism, the main motor parts of the inner workings of a ceiling fan were removed from being positively claimed (canceled claims) as not being part of the claimed invention and therefore are not necessary to be shown in the drawings. The reference characters "10", "12", and "14" were corrected in the specification to refer to the cover 10, main body 12, and base of the cover/narrow end 14. Additional reference indicia were added to correspond to the specification, namely: a surged edge 11, elastic ends having a heavy bar tack stitch 19, unfinished ends having a heavy bar tack stitch 31, 32, with a heavy bar tack stitch 19, 31, 32 being shown by an "X" marking the stitch area.
